

## Super Pharmacy Plus

### Supporting Your Patients with Effective CPAP Services

At Super Pharmacy Plus, our CPAP consultant, Dani has over 25 years experience in the industry. Your patients rely on your guidance to manage this condition effectively - and that's where our CPAP services can help.

### What can we provide for your CPAP requirements?

We specialise in a full range of CPAP services tailored to support your patients' unique needs:

Meet our CPAP Consultant, *Dani*

Phone: 3355 3052

- **Personalised CPAP Consultations:** We offer personalised consultations where patients can learn about CPAP therapy, types of machines, and the accessories that best suit their lifestyle and condition severity.
- **Sleep Studies:** We offer a full diagnostic Level 3 home-based Sleep Study. Apnealink Air provides a portable and easy to use home sleep screening device for patients. It is a cost effective and convenient method.
- **Equipment Trials/Rentals:** Trying CPAP equipment can be daunting. We offer trial and rental programs, allowing patients to test various machines and mask types, to ensure they find a comfortable fit.
- **Ongoing Support:** Once patients have begun therapy, they may need adjustments or replacements. We provide ongoing support, including troubleshooting common issues, helping with adjustments, and providing replacement parts as needed.

### Partnering With Dr Lockie

Obstructive sleep apnoea untreated can create a risk for any surgery. In addition it is an active component for enhanced metabolism, ultimately resulting in maximum weight loss and significant reduction of health issues such as diabetes and hypertension.

### Referring Patients

We are happy to take care of Dr Lockie patients. Simply [contact us](#) to find out more about our CPAP services. We'll ensure all Dr Lockie patients receive the knowledge and support to make their CPAP journey as straightforward as possible.

### Other Services We Offer - Mobility Services

Our Mobility Team can provide tailored solutions for patients requiring assistive equipment to enhance their independence and safety. We offer a range of products, including rollators, wheelchairs, and mobility aids, along with expert guidance on selecting the right equipment for each patient's needs. Our team is dedicated to working with healthcare providers to support optimal patient outcomes and ensure a seamless experience. We're here to help improve patient mobility and support their journey to greater independence.
